Comprehensive Training and Consultation

David Martin instructing.

The importance of an Experienced Instructor

Comprehensive Safety Training by an instructor authorized by the Occupational Safety and Health Administration (OSHA), and by the Mine Safety and Health Administration (MSHA) of the US Department of Labor.

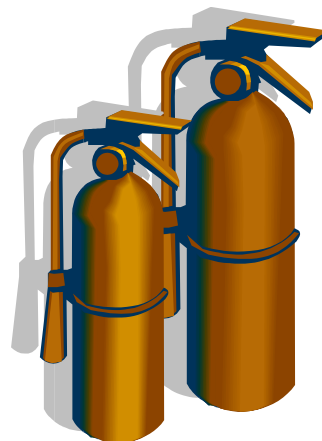

David Martin retired from the Occupational Safety and Health Administration after a 30 year career with the agency. He served as a Compliance Assistance Specialist, Assistant Area Director, OSHA inspector and Training Specialist.

A full range of services

OSHA 10 or 30 hours classes can be scheduled at your location or at public facilities. We can provide training on the hazards of electrical arc flash and the application of NFPA 70e. Training is also available for Accident Investigation and most types of required training under both OSHA and MSHA covered workplaces, such as lock-out, bloodborn pathogens, chemical hazard communications, confined space entry, lift truck safety, use of personal protective equipment and other topics.

For the OSHA 10 or 30 hour classes to be completed at your facility all that is needed is three students and space for the class. Each student receives an OSHA certificate of completion wallet card.

The 10-hour Construction Outreach Training Program is intended to provide awareness on recognizing and preventing hazards on a construction site. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers covered by the OSHA Construction Standards. Workers must receive additional training, per 29 CFR 1926.21(b)(2) on the specific hazards of the construction job. This class is required for many construction workers by New York and most New England States.
